# Devine Agribusiness Accounting

At Devine Agribusiness Accounting we have one core focus - the provision of competent accounting and taxation services to our small business and primary producer clients throughout rural and regional Queensland. To do this we have assembled a dedicated team of professionals to assist you with your accounting and taxation needs.

Having always specialised in agribusiness, we know and understand primary production and the relevant taxation regulations. And having been a small business based in regional Queensland for over 15 years, we also understand the challenges faced by small business in regional areas.

As part of the Devine Agribusiness group, our clients also enjoy access to a wide range of agribusiness related skills and experience should they require assistance in other areas of their business, such as business management, rural finance, natural resource management, and rural valuation services.
